Welcome

Welcome to viewing our 'Pedigrees with a Difference with Performance on the Hook' Autumn bull sale offering.

Now in our fifth year here on King Island since relocating from Drillham, Queensland we have not only got management systems better understood and in place but also seedstock bull production back up to levels where mainland sales now become a practical and obvious decision.

We currently have a split calving of near 800 breeders – Autumn Feb/March and Spring Sept/Oct. These numbers will increase over the next year or two to calve down 850 stud females each year. We have a split calving ultimately to cover the workload. Excluding contractors engaged for fertiliser and hay requirements it's just Anna and myself here with our family during the school holidays.

Early in January we sent fifty-four bulls across to mainland – fifty of them being the entire group of autumn born bulls with the remaining four being spring born sires used within herd as yearlings. These bulls are now located on Rob Hutchinson's farm at Taminick Victoria (between Wangaratta and Glenrowan), about an hour's drive south west of Albury Wodonga.

Unlike last year's September sale, where it was auctioned through an on-line platform only, we will be incorporating an on-property auction whilst still using the online platform through Elite livestock Online Auctions.

With the continued uncertainty of travel restrictions all bulls will be individually photographed and videoed and independently structurally assessed by Roger Evans for extra peace of mind for those that cannot make either inspection or sale day. Ced Wise will be doing the Breeding Soundness Examination and semen test.

We have again named this sale the 'Pedigrees with a Difference with Performance on the Hook' Autumn Bull Sale. We have not chosen to follow the mainstream direction of pursuing low birthweight, low mature cow weight and extreme marbling types – hence our '**Pedigrees with a Difference**'. For the past five years, excluding animals sold for seedstock, we have pasture fattened and finished on farm every Raff Angus animal that has left the property. We now have hundreds of carcasses assessed through both

processors JBS and Greenhams. Each of these animals are pedigree documented giving us invaluable feedback on where we sit nationally and genetically from a carcass standpoint. Every processing sheet is available on our website along with detailed graphs that, without question, highlight our cattle are more profitable than science portrays – hence '**with Performance on the Hook**'. Further to the results shown within this catalogue please be sure to view further carcass feedback on our website - www.raffangus.com.au

The lead group of bulls that sell are heavy weighing, large framed bulls with extra yield and the inherent feed efficiency traits. I believe that it would be hard to find many Angus bulls within this autumn sale season to be as powerful as the lead of this group. The second run of bulls offer a selection of more moderate types, many suitable for heifers, with loads of thickness and actual muscle definition and expression.

The Australian Beef Industry needs diversity of types to suit different environments, markets and personal preferences. We are very proud of our herds genetic variance to mainstream and pleased to present a line up of autumn sale bulls different in type to mainstream.

It is easy to form opinions from what you hear from others and from what one reads on a piece of paper. We strongly encourage personal inspection in order for a better factual understanding of our program based from what you see in the yard pens and from conversations with us.

Sincerely,
Andrew & Anna.

Raff Angus... 56 years of dedicated breeding to the Angus Breed for the Australian Beef Industry

”

Raff Angus Carcass Data...

These below MSA Index graphs show where Raff Angus sits nationally with its genetics on animals processed throughout the 2020 year. Please take the time to scroll through these to better understand the genetics of Raff Angus from a carcass standpoint not from a scientific assumption on paper calculated from a herd with little linkage to mainstream Australian Angus genetics.

The below graph lists details on the 89 steers that are autumn born contemporary brothers to bulls that sell March 26th. It shows the National comparison for all steer animals processed for month of December 2020. With the same ossification score these Raff Angus genetic brothers to sale bulls produced a 47kg heavier carcass weight. With the grid price of \$6.70 at that time this equated to a \$315 per head increased dollar value or nearly a \$12,000 increase per trailer load.

CARCASS ATTRIBUTES				
	YOUR AVERAGE RESULTS	NATIONAL 5TH PERCENTILE	NATIONAL AVERAGE	NATIONAL 95TH PERCENTILE
MSA INDEX	61.9	55.71	60.85	65.13
CARCASS WEIGHT (KG)	363	242	316	399

OSSIFICATION (100 - 590)	150	110	150	190
AUS-MEAT MARBLING (0-9)	0.9	0	1	3
MSA MARBLING (100 -1190)	320	190	330	530
RIB FAT (MM)	7	3	7	13

Carcass attributes data only includes MSA compliant carcasses.

Raff Angus results National Results

Photo Below:

Steer brothers to autumn sale bulls. This trailer load averaged 387kg carcass weight or 76kg more when compared to the national average for 2020 processing year-end - same ossification average. At December grid of \$6.70, it equated to \$509 more per head value.

These 111 steers and heifers are contemporary brothers and sisters to bulls that sell March 26th. The below graph details the Raff Angus combined steer and heifer autumn born National comparison for all animals processed for the month of December 2020. With the same ossification score for all animals processed that month these Raff Angus animals had a:

- **59kg heavier carcass weight**
- **Higher MSA Index**
- **More marbling**
- **More Fat**

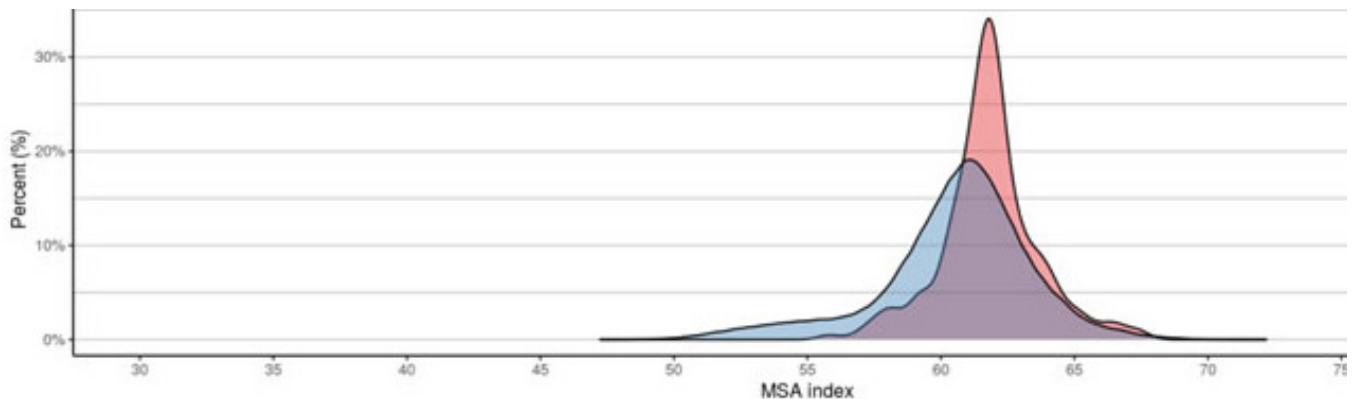

Raff Angus results National Results

CARCASS ATTRIBUTES				
	YOUR AVERAGE RESULTS	NATIONAL 5TH PERCENTILE	NATIONAL AVERAGE	NATIONAL 95TH PERCENTILE
MSA INDEX	61.07	55.26	60.31	64.74
CARCASS WEIGHT (KG)	357	226	298	389
HUMP HEIGHT (MM)	65	40	65	95
OSSIFICATION (100 - 590)	160	110	160	200
AUS-MEAT MARBLING (0-9)	1.1	0	1	3
MSA MARBLING (100 -1190)	340	190	330	520
RIB FAT (MM)	8	3	7	13

Carcass attributes data only includes MSA compliant carcasses.

The below details the National comparison for the 213 Raff Angus Steer Carcasses processed against the near 558,000 bodies during the 2020 year. With only a 10-point ossification variance these 213 Raff Angus 100% pasture raised, no HGP & no antibiotic steers boasted a 65kg heavier carcass with a higher MSA Index, more marbling and more fat.

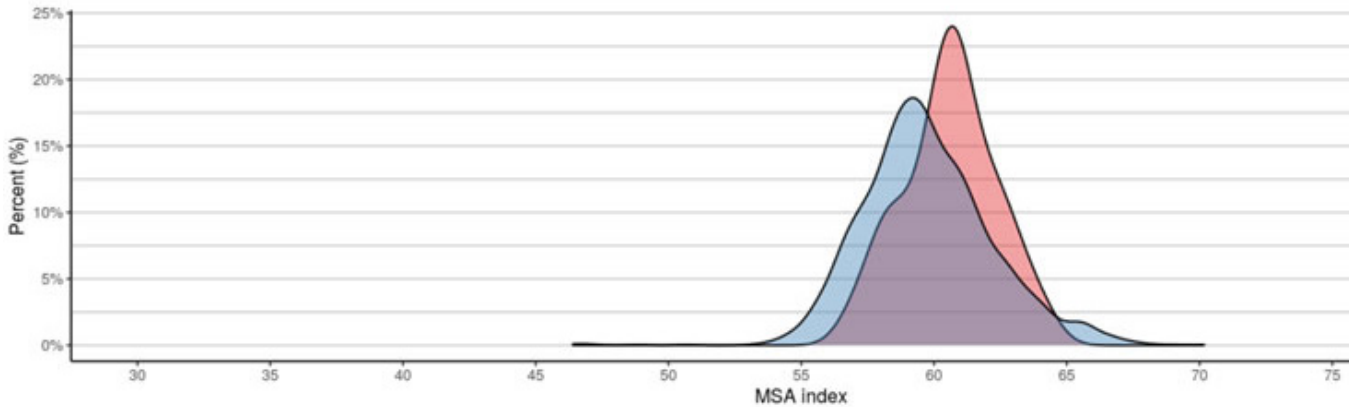

Raff Angus results National Results

CARCASS ATTRIBUTES				
	YOUR AVERAGE RESULTS	NATIONAL 5TH PERCENTILE	NATIONAL AVERAGE	NATIONAL 95TH PERCENTILE
MSA INDEX	61.81	54.58	60.54	64.71

Sale Information

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

- 1  Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
- 2  Click on the "Sign Up" page / link
- 3  Create a bidding profile using the bidder registration page. *(You can either register as a livestock agent, company or private buyer.)*
- 4  Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5  Click "Register"
- 6  You will then be notified by email that an account has been created

- 7  Once an account has been created you are all "Set to Bid"
- 8  Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
- 9  Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
- 10  The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
- 11  On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding. *(There is no need for software download)*
- 12  At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Sale Information

Sale Day

All bulls will be auctioned on-farm at 770 Taminick Gap Road, Taminick Victoria with sale starting from 1pm. This sale be also be interfaced through the Elite Livestock Live In-room Online Auction platform.

Please go to www.elitelivestockauctions.com.au where it shows how to register on-line or be sure to contact Elite Livestock Auctions direct on 1300 15 31 35 for any queries.

Michael Glasser of GTSM Ray White will be auctioneering the lots. Michael has sold for us over many sales when in Queensland. If you would prefer to bid over the phone please contact Michael before the sale to arrange – 0403 526 702.

Inspections

Bulls will be available for inspection the week prior to sale day on Friday 19th March. If this day does not suit alternate days can be arranged by appointment - please contact Michael Glasser 0403 526 702 or Andrew Raff 0429 691 975 to arrange.

Registration Status

All but one of the bulls are Herd Book Registered with the Angus Society of Australia. The other is APR.

Animal Identification

All bulls are freeze branded with the 'bench axe' symbol, year letter and number. A near side ear tag has the bulls ID, year letter and number. The off side ear has the bulls NLIS tag. Lot tags and numbers will be paint branded on bulls for inspection days and sale day

Performance Information

- **Carcass Evaluated** – genetic brothers and sisters to these sale bulls were processed on 20th December 2020. These results are available on pages 4, 5 & 6. In the past 3 years we have processed over five hundred 100% Raff Angus Pedigree and Performance Recorded animals. These results totally contradict their \$\$ Index values and carcass EBV's. It is insulting to have the majority of these sale bulls reported as less profitable by way of a graph on a piece of paper. Further we strongly recommend that you visit www.raffangus.com.au – CARCASS DATA where you can view the carcass feedback information on every animal processed over the past 3 years.

- **Sire Verified** – all bulls have been Sire Verified.

- **Genomic Tested** – all bulls have been HD50k tested. This information has been analysed and included within March 2021 TransTasman Angus Cattle Evaluation.

- **Raw Data** - Ultrasound scanning data along with bulls actual scrotal and hip height measurements are located on page 20 & 21.

- **EBV Information** - March 2021 TransTasman Angus Cattle Evaluation EBV's for all lots are published on pages 22 & 23. For quick reference and again individually within each lot.

- **Structurally Assessed** – these bulls were assessed by Roger Evans.

Health Treatments

All lots have been Ear Notch tested free of Pesti-virus. They have been vaccinated for Tick Fever and are ready for immediate transport into ticky areas however a booster is recommended post sale on arrival at your farm. They have been Pestiguard & 7in1 vaccinated. Early January prior to transporting they received a Cydectin Injectable drench, Multimin and HyB12 health treatment

The mature cow weight debate: Is a big tractor less efficient than a small one just because it consumes more fuel?

Breeding Soundness Examination and Semen Test

All bulls have undergone a thorough examination by Ced Wise to check their physical structure and breeding anatomy both internally and externally. All bulls have produced viable semen using the crush slide morphology test.

MUSCLE SCORE (+ -) – assessed by Roger Evans

The Muscle score separates animals from the same contemporary on their muscle definition. Animals which have extreme muscle score 'A'. Animals that have limited muscle expression are scored as 'E'.

TEMPERAMENT SCORE – assessed by Roger Evans

The temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet (touchable) score '1'. Animals that are aggressive or extremely agitated in the crush are scored as '5'.

Photos & Videos

Individual photos and videos were taken by Ben Hooper of Clear Vision Imaging late February.

Delivery

Bulls will be available for delivery immediately after the sale. Livestock carriers Falls Transport will be handling all of the transport and delivery arrangements – Lachie Falls 0429 826 342.

Sight unseen guarantee

We expect that under the current COVID environment and individual personal safety concerns that a number of bulls will be purchased 'sight unseen'. We are happy to assist with selections by offering an unbiased and honest assessment of the bulls. Those that purchase any lot sight unseen within this catalogue, that have discussed their selection with the vendor, are offered an unconditional money back guarantee of the lots purchase price if the purchaser is not satisfied with their purchase within seven days of taking delivery of their bull.

Guarantee

In the unlikely event of a bull proving incapable of natural service within 12 months of purchase, provided it is not caused by injury or illness after the fall of the hammer, the vendor agrees to provide the purchaser with a satisfactory replacement if available or issue the purchaser with a credit equal to the purchase price minus salvage value that may be used to purchase another Raff Angus bull. A veterinarian certificate must be presented to Raff Angus within this 12-month timeframe.

Disclaimer

We pride ourselves on our upfront, honest and sometimes critical appraisal of our cattle. We are always happy to provide assistance to those seeking guidance and our opinion. However, the final decision will always be that of the potential purchaser. The partners of Raff Angus are not in any way responsible for the final result or performance of any resulting purchase outside of our guarantee.

Insurance

We strongly encourage successful purchasers to insure their bulls for loss of use from illness or injury and death. Generally, the highest risk for any mishaps occurring is within the first six-month period from purchase date while the animals are transported, adjust to their new environment and settle into their new animal groups.

Phone Bidding

Phone bidding facilities will be available on sale day. It is essential to make contact with your preferred agent or the vendor prior to the sale to ensure that contact can be made on sale day. Contact Michael Glasser for any enquiries – 0403 526 702.

“

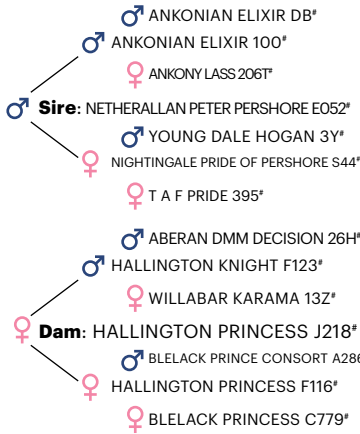

It is important to select for as much of any economically trait within a breed but as soon as we start to change another trait of importance specific to that breed we must stop there and accept that this is as far as we can go.

”

REF

RAFF LETHAL WEAPON L156 PV

ID: QRFL156 DOB: 25/02/2015 HBR AMFU,CAFU,DDFU,NHFU

This is the 'power bull' within the Angus Industry. Sometimes we use sires that we don't necessarily want our herd to replicate but use them to inject particular traits of importance. For Lethal Weapon it was - growth, weight and yield with the inherent efficiency trait. Each of his progeny have added frame and always weigh heavier within their contemporary groups. We have had sons go through to carcasses hanging on hooks and despite being reported on paper as a least profitable animal by way of a graph they totally contradict this and are always the highest dollar valued carcass on the hook. He has proved that carcass weight and yield still drive profitability. His calves do weigh heavy at birth but despite his EBV they are born easily. He was imported by us as an embryo from the United Kingdom after personally inspecting his full brother. The sons that sell are standouts and extraordinary performance bulls - heavy in weight with stature and expressive muscle patterns.

ONEILLS PRIME STAR 80

ID: USA16717557 DOB: 10/01/2010 HBR AMFU,CAFU,DDFU,NHFU,MAF

Imported by us as a semen sire several years ago Prime Star has been a very consistent sire for producing progeny with added softness and extra carcass quality. His sire is one of Americas leading marbling sires. His dam is one of O'Neill Angus Farms most prolific breeding cows. Sons have always sold well at past sales with daughters well into production proving strong maternal cows with good fertility and udder shape with capacity. For a sire with marbling genetics, he passes good bone structure and shape onto all his progeny.

SAV SENSATION 5615 SV

ID: USA18258149 **DOB:** 06/01/2015 **HBR** AMFU,CAFU,DDFU,NHFU,MAF

Sensation was used to replace intended embryo flush AI sire SAV Seedstock following a delay on the arrival of the semen tank. Thanks to Killian Angus Stud we were able to access Sensation as a replacement. The intention for the use of these genetics was to add the two greatest Schaff cows into our breeding program - Blackcap May 4136 and Madame Pride 0075. The only son in this sale is a used sire who we joined to heifers following an AI program. He is softer than butter whose dam is one of our best matrons - Raff Doris E12.

RAFF DANNY BOY D207 PV

ID: QRFD207 **DOB:** 19/07/2008 **HBR** AMFU,CAFU,DDFU,NHFU

Raff Danny Boy D207 was imported as an embryo from the famous Hoff Scotch Cap Angus program and sold to K5X Angus Stud where he became one of their most successful Angus sires ever. His full brother Raff Distinction D197 was retained by us and considered one of our better bulls resulting from our USA Hoff embryo project. He was as wide-based a sire as you could find with excellent feet and legs with length and strength of spine. He had incredible width and depth of hindquarter that usually you would only find in Euros. The only son to sell will breed well beyond himself and must not be overlooked. His dam is our wonderful matron Raff Doris E12 whose grandam retired when in excess of 20 years of age.

SAV SEEDSTOCK 4838 SV

ID: USA17923480 DOB:15/01/2014 HBR AMFU,CAFU,DDFU,NHFU

SAV Seedstock 4838 was an obvious choice for us to use to further enhance our maternal strength. His dam and sires dam are the two most dominant and high earning cows within the Schaff Angus program – this cannot be ignored. If you add Madame Pride 0075 to SAV Resource then you have Seedstocks pedigree. He was the \$235,000 bull Herbster Angus selected at the 2015 SAV sale. His phenomenal dam, SAV Blackcap May 4136, has generated over \$10 million in progeny sales. Herbster are quoted as saying... 'Seedstock has majestic maternal presence, is loaded with performance and is structurally superb. He is powerfully built and stunning from all angles with superior soundness and herd bull authority.'

RAFF ULTIMATE U27 SV

ID: QRFU27 DOB:11/06/1999 HBR AMF,CAFU,DDFU,NHFU

Ultimate was a magnificent and large framed bull so docile in nature and sound in structure. Following several seasons of within herd use, we sold him privately for \$30,000 to Teyon Station, Alice Springs. Ultimate went through the 1st cohort of the Angus Progeny Test Program. Ironically, despite his very low Rib & Rump Fat EBV's, his progeny from a carcass standpoint had some of the higher actual fat depth measurements. His dam was a super fertile cow containing two of the three sires we imported live from the USA – Hoff Rafferty and Premier Commodore. Ultimate will be a sire we will use a little more of in the years to come.

RAFF JOVIAL J350 ^{DV}

ID: QRFJ350 **DOB:** 21/07/2013 **HBR** AMFU,CAFU,DDFU,NHFU

Raff Jovial J350 is the bull to use if you want to return width of hip and pin to your females with increased spring of rib, capacity and udder quality or to bring back the traditional head shape and muzzle strength, improve docility, get away from the narrowing Australian Angus gene pool or even to simply add extra muscle. He is a well-proven sire who is now located at Mylong Angus Stud, Young NSW where he will see his later years in stud duties. Jovial has been a brilliant stud sire for us. With his departure, we will certainly be using some outstanding yearling sons. His dam was an extraordinary cow – big in stature and heavy in weight. There are some really good beef bull sons in this sale.

RAFF EXPLOSIVE E108 ^{PV}

ID: QRFE108 **DOB:** 21/04/2009 **HBR** AMFU,CAFU,DDFU,NHFU

Raff Explosive E108 is one of only a handful of Connealy Danny Boy sons in Australia imported by us as an embryo from one of the four Hoff Scotch Cap females we purchased at their dispersion sale in 2006. He is a massive bull that typifies what a Raff bull should be displaying with phenomenal growth, extreme length and capacity, great neck extension and shoulder set. He was sound on his feet and legs with a powerful head and strength of jaw and prowled the paddock like a cat while maintaining his condition at the completion of a season. His only son in the sale is a cracker with individual performance just like his father.

RAFF EMPIRE E269^{SV}

ID: QRFE269 **DOB:** 20/08/2009 **HBR** AMF,CAF,DDFU,NHF,RGF

Raff Empire E269 is a 10th generation Raff bred bull that traces back to our foundation cow, Sarum Doris 19th purchased in 1965. We still consider Empire to be one of the greatest bulls we have ever bred. During his show career, he clocked up over 28,000 kilometres in trucks going to shows where he won eleven Inter-breed Supreme Beef Exhibit titles. He broke tradition to most acclaimed show bulls by breeding the house down with now nearly 500 progeny recorded nationally. We used him for many seasons with sons and daughters topping sales over the years. We have numerous daughters in production exhibiting great maternal qualities. His only son selling is a genetic brother to Raff Hercules H411.

RAFF HERCULES H411^{PV}

ID: QRFH411 **DOB:** 13/09/2012 **HBR** AMFU,CAFU,DDFU,NHFU

Sired by the world acclaimed Raff Empire E269 who was undefeated, all breeds, on the country show circuit in Australia during his show career within our 2010 -2012 three-year marketing campaign when 34 shows were attended and over 28,000km were travelled. The dam of Hercules is sired by maternal sire Shady Brook Prime 251F. Her dam, Hoff Blackbird 5217, was purchased by us at the famous Hoff Scotch Cap Angus dispersion sale in 2006. She is a maternal sister to Hoff Limited Edition and dam of numerous sons used at Raff Angus. A full sister to Hercules topped our 2012 Female Sale selling for \$17,000 when just 8 months of age while a 3/4 brother, sired by Raff Empire E269 from another Blackbird 5217 daughter, topped our 2013 bull sale selling for \$32,000 at 14 months old. Raff Hercules H411 typifies the type of bull Raff Angus strive to breed – big and powerful, correct in his structure, long & wide based with a high yielding carcass of quality beef. He sold for \$25,000 in 2015 to Greenland Pastoral, Guyra.

RAFF KNIGHTRIDER K16 ^{PV}

ID: QRFK16 DOB:18/02/2014 HBR AMFU,CAFU,DDFU,NHFU

Knightrider K16 was regarded by us as a real beef bull comparable to the best of any breed selling at our 2015 Drillham, Queensland sale for \$16,000. We have always tried to breed Angus cattle with extra growth, weight for age and yielding potential comparable to that of a European yet retain all the fertility, maternal and high-quality carcass attributes that the Angus breed is renowned for. At 15 1/2 months, his raw data was 774kg's, 1.54kg daily gain, 40cm scrotal, 10/6mm fat, 120sq cm EMA, 5.6% IMF. There is just the one son in the sale and easily considered by us as one of the best.

RAFF STEWIE L62 ^{PV}

ID: QRFL62 DOB:12/03/2015 HBR AMFU,CAFU,DDFU,NHFU

Sold at just 12 months for \$15,000 to Llandarlo Angus Stud, Raff Stewie L62 has plenty of performance both on paper and within pedigree. His sire was moderate framed yet thick in profile that truly excelled for finish and marbling ability being proven through the Angus Australia cohort program. His dam, whilst large in frame and heavy in weight was superbly feminine and extraordinarily well balanced for her unique scale – she was faultless. His sons that sell, using Lockhart as their names, have his inherent length with improved carcass quality traits.

RAFF NEPTUNE N4 ^{SV}

ID: QRFN4 DOB:08/02/2017 HBR AMFU,CAFU,DDFU,NHFU

This super structured sire contains some absolute power genetics within his pedigree. His sire, from Denmark, is big in stature and big in weight with tremendous strength of spine. His dam, sired by Raff Empire E269, is out of a flush sister to Raff Dictator D364 - a massive 64inch direct Hoff Scotch Cap import that weighed over 1400 kilograms. Neptune himself was one of four bull calves within his contemporary that weighed over 500 kilos at 9 months of age with his weight the heaviest. The number of sons that sell in this sale combine extra softness and carcass quality from their dams with his natural thickness and definite muscle expression. Many should be suitable for heifers.

RAFF LAZARUS L227 PV

ID: QRFL227 DOB: 11/06/2015 HBR AMFU,CAFU,DDFU,NHFU

Raff Lazarus L227 is the result from genetics out of the United States and the United Kingdom. His dam was one of six magnificent full sisters imported as embryos from Hoff Blackbird 5217 – bought by us at the Hoff Scotch Cap dispersion sale in 2006. These sisters have had a huge genetic influence in our herd. His sire was personally inspected by us when touring the UK where we subsequently imported semen from him. The genetic makeup of Lazarus is very different to mainstream. His daughters are super maternal types and are shortlisted to breed a sire or two from. His sons that sell are very long and smooth fronted. Keep their daughters.

ONEILLS FRONTIERSMAN

ID: USA17281878 DOB: 23/01/2012 HBR AMFU,CA1%,DDFU,NHFU

O'Neill's Frontiersman was the top performance bull calf in the 2012 O'Neill's calf crop, in fact, he was the heaviest yearling weight bull ever produced at O'Neill Angus. His dam is a daughter of O'Neill's Expedition and a full sister to the sire of the Pen of 8 steers that were the high gaining, high feed efficiency combination pen of steers in the 2011 Tri-County Steer Futurity competing against over 9,000 steers. At our last sale in September a son topped at \$20,000 selling to the Paton Family of Corryong, Victoria. There are two sons selling this March – both are thick topped with good hindquarter expression.

Lots 1 to 4 were used within herd as yearlings with calves now on the ground.

Lots 5 to 54 were run as one management group up to scanning 22nd November 2020.

Up to 20th January, when all lots were transported to Glenrowen, they were 100% pasture raised.

Sire Verified.

Independently Structurally Assessed.

Ultrasound Scanned for IMF%, EMA & Fat.

HD50k Genomic Tested. Breedplan Evaluated.

Semen Tested & Breeding Soundness Examined.

Vaccinated for Tick Fever, 7in1 & Pestiguard.

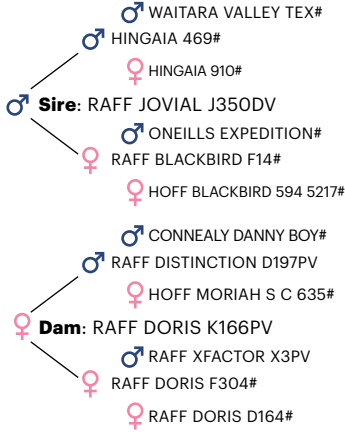

Ear notch tested free of Pesti-virus.

111 same contemporary group steer brothers and sisters were processed late December 2020 - Refer to pages 4, 5 & 6 to view their results for national comparison.

RAFF PERFORMER P215 SV

ID: QRFP215 DOB: 23/09/2018 HBR AMFU,CAFU,DDFU,NHFU

Used stud sire. A standout from birth and at weaning recorded a 466kg weight at 270 days. He has tremendous jawline and muzzle strength with well-hooded eyes and good bone. He is a very easy fleshing bull with extra length of hip to pin. His magnificent dam at scanning recorded the highest P8 Fat measurement, equal highest Rib Fat and the highest IMF% scan at 8.1% within her contemporary group of over 120 'K' heifers. A full sister to K166 has been a donor. This lots sire contains a unique pedigree of pure power from his dam combined with structural integrity, longevity and efficiency from his sire.

RAFF POPEYE P239 SV

ID: QRFP239 DOB: 25/09/2018 HBR AMFU,CAFU,DDFU,NHFU

Used stud sire. I doubt you will find many Angus bulls with the extreme backend width and extra width of pins that this sire has! He is a massive beef bull with a great skin type and top line strength. His dam is a moderate framed cow but phenotypically ideal with a great udder shape and teat placement. His sire was imported by us as an embryo from the United Kingdom. Do not be afraid of his birth weight - trust our 56 years of breeding knowledge and remember that if you were to translate his birth EBV to that of a European bull he would be below breed average when compared. Weight still drives profitability and his calves with have plenty with the bonus of big carcass weights, extra yield with inherent efficiency.

RAFF LETHAL WEAPON P323^{SV}

ID: QRFP323 DOB: 06/10/2018 HBR AMFU,CAFU,DDFU,NHFU

Used stud sire. We ran him with the previous lot joined within a group of cows that were moderate framed and easy fleshing. He is another big statured son of our UK import sire introduced because of his outcross genetic lineage and extreme muscle, weight and yield qualities. As with the previous lot most will look at his birth EBV and totally disregard him... please don't. Low birth EBV cattle are easy to breed but there must be consideration to weight gain potential beyond the day they are born. In our 56 years of breeding Angus Seedstock, we have never put selection on a birth weight but instead a huge emphasis on actual calving ease - there is a big difference. This is a tremendous beef bull with big feet, good bone, a tight underline with a very high yielding body of beef. His dam is a prolific breeder and very docile in nature.

RAFF PENGUIN P432^{PV}

ID: QRFP432 DOB: 08/12/2018 HBR AMFU,CAFU,DDFU,NHFU

Used stud sire on heifers. Soft as butter with complete body smoothness and maternal uniqueness. His sire was a high seller and big performing bull at the Schaff Sale several years ago. Actually, it was his full brother that interested us, SAV Seedstock 4838, but upon flush time his semen had not arrived so thanks to Killian Angus we were able to hastily get several doses of Sensation in time... hence this is the result. The donor dam to P432 is simply a magnificent matron and true representation of everything good about Angus. Still active and sound at 13 years she has been a prolific breeder. In fact, her granddam, Doris S128 lived beyond 20 years of age. It was an impressive IMF% scan of 6.9% with a fleck score of 5+ after this lot had been used.

RAFF LAZARUS Q5 SV

ID: QRFQ5 DOB: 23/01/2019 HBR AMFU,CAFU,DDFU,NHFU

Q5 developed a huge hindquarter expression from a very young age and now shows an expressive jump muscle. He has good frame and is very tight sheathed with improved docility. His dam is of good type whose sire ranked very highly during the early adoption of genomics when we toyed with the creation of our own in herd selection parameters. Her dam oozes of maternal qualities with a fine skin and masses of milking ability. Use this bull for any breeding purpose.

RAFF JOVIAL Q9 SV

ID: QRFQ9 DOB: 25/01/2019 HBR AMFU,CAFU,DDFU,NHFU

A very high yielding body shape with forearm strength and hindquarter development - his calves will certainly have shape. His maternal granddam, Doris X169, had a full brother imported live to Thailand as a yearling. The sire of his dam, Netherallen Peter Pershore, was imported from the United Kingdom by us through 10 straws of his semen and 6 embryos following my father's personal inspection. He was UK's highest performance sire and the most widely used AI sire there for three consecutive years.

RAFF NEPTUNE Q24 ^{SV}

ID: QRFQ24 DOB: 30/01/2019 HBR AMFU,CAFU,DDFU,NHFU

A tremendous weight for age bull that is a very thick made bull with depth and substance and a big hindquarter. His EMA scan was the largest within his contemporary group of 57 bulls with a measurement of 127sq cm. Despite his abundance of red meat, he is still soft - constitutionally... not by way of lumps of fat. Combine this with a large scrotal size you would have to say he has all fundamentals for profitable beef production covered.

RAFF DANNY BOY Q25 ^{PV}

ID: QRFQ25 DOB: 30/01/2019 HBR AMFU,CAFU,DDFU,NHFU

The power of the pedigree. This lot will unquestionably breed beyond expectations with absolute structural integrity. His sire, Raff Danny Boy D207, was imported by us as an embryo out of one of the four Hoff Scotch Cap cows we purchased in 2006. Selling as one of the high sellers at our annual sale when in Drillham he went on to become one of the best breeding bulls for K5X Angus. Q25's dam is superb as commented within lot 4. Keep all his daughters as they will breed on.

RAFF EXPLOSIVE Q40 SV

ID: QRFQ40 DOB: 30/01/2019 HBR AMFU,CAFU,DD2%,NHFU

As clean fronted a bull to be catalogued in the sale with tremendous neck extension and head carriage. He is very fine skinned with plenty of natural thickness and length of hip to pins complimented by superb mobility. Not only does he boost a big weight for age but at scanning he recorded the highest P8 Fat measurement, equal highest Rib Fat and 2nd highest IMF% recording. Import sires Raff Explosive and Raff Emperor feature within along with our 'once in a lifetime' cow Blackbird F14 and Hoff Limited Editions grandmother Starlette 3V9. From big bullocks that weigh heavy to replacement females that breed on this lot must be considered.

RAFF STEWIE Q50 SV

ID: QRFQ50 DOB:31/01/2019 HBR AMFU,CAFU,DDFU,NHFU

One of the more moderate framed lots to sell within the first half of this high-performance group. There is a bit more softness in him however this should not compromise his potential efficiency of conversion. Despite his cauliflower ear there is loads of phenotype qualities in his pedigree with both Doris F172 and K213 very good-looking cows. His sire combined carcass with absolute power.

RAFF STEWIE Q60 SV

ID: QRFQ60 DOB: 01/02/2019 HBR AMFU,CAFU,DDFU,NHFU

Suitable for heifers. Raff Stewie Q60 has extreme smoothness of front end with a very good skin type which stems from his maternal cow line. Not only is he smooth fronted but his general smoothness of body type suggests that his progeny would be of easy finishing types. At scanning his Rib and Rump fat measurements were above his contemporary group average with an excellent marbling fleck distribution.

RAFF LETHAL WEAPON Q86 SV

ID: QRFQ86 DOB: 04/02/2019 HBR AMFU,CAFU,DDFU,NHFU

Although a little rough around the edges there is certainly some punch in this bull combining extra weight for age with muscle, yield and efficiency. Note that his dam is a genetic sister to bulls that have topped past sales. For this complete group of autumn born male calves' 65 percent were processed late December last year to average 363kg carcass weight at 21 months. Contrary to the likes of this bull's fat EBV and \$\$Indexes, his processed steer brothers easily met fat specifications and were the most profitable sire group.

RAFF LETHAL WEAPON Q135 SV

ID: QRFQ135 DOB: 07/02/2019 HBR AMFU,CAFU,DDFU,NHFU

No need to use a black Euro when you can have an Angus bull with this much punch. Beyond the obvious fertility and calving - inherent within the Angus breed but inaccurately graphed for outcross genetic lines like ours - key profit drivers are weight for age, growth, yield, carcass weight with efficiency. It would be hard to find another bull that can beat this lots genetic capability. His dam is a sister to past high sale sellers. He didn't enjoy the Bass Strait crossing but hopefully will correct himself by sale day.

RAFF LETHAL WEAPON Q197^{SV}

ID: QRFQ197 DOB: 21/02/2019 HBR AMFU,CAFU,DDFU,NHFU

This is a standout sire and a real herd improver for any breeding program. Again, the point must be made that he was born easily and unassisted and his progeny will be the same. Do not ignore him because of a mid-parent scientific assumption graphed on paper generated from a herd with very little mainstream pedigree linkage. He was the heaviest at scanning weighing 902kg at 21 months off grass only with a big scrotal, big EMA with enough fat and IMF. Length weighs and weight pays. Bulls like this must be admired as his visual appearance and raw performance are as good as they get - any breed.

RAFF JOVIAL Q212^{PV}

ID: QRFQ212 DOB: 28/02/2019 HBR AMFU,CAFU,DDFU,NHFU

A remarkable pedigree proving that old genetics still perform to meet modern requirements. Not on paper perhaps but certainly in the paddock. Excluding Hoff Blackbird 594 5217 the other three maternal dams within each bottom corner of his pedigree were born in 1982, 1992 and 1993. This Jovial son is super docile with a traditional muzzle and extra capacity - just like his dam that is about to calve down her 8th calf whilst remaining very sound footed.

RAFF LAZARUS Q224^{SV}

ID: QRFQ224 DOB: 04/03/2019 HBR AMFU,CAFU,DDFU,NHFU

A genetic brother to lot 20. This bull is best described as uncomplicated. He is very docile with a strong head and good hoods that tracks well when walking out. Again, contains a pedigree that is very strong maternally. His dam is a matron with loads of volume, big in rib capacity and milk. Herself and flush sisters have all bred extremely well with a Jovial son from sister Raff Dream L174 currently being used whilst a Hercules son from that same cow sold for \$24,000 at the Sydney Royal Show and Sale several years ago.

RAFF MAGIC Q239^{SV}

ID: QRFQ239 DOB: 09/03/2019 HBR AMFU,CAFU,DDFU,NHFU

Possibly the most phenotypically pleasing lot to sell. Carrying a traditional head with excellent natural fleshing this lot is hard to fault. His dam blew those within her contemporary group away weighing 766kg at 23 months yet staying feminine and fertile. Q239 is double bred to show sensation Raff Empire E269. We are really proud to be able to offer pedigrees so different to mainstream despite it affecting linkage opportunities within herd for our raw data to be fairly and accurately analysed.

RAFF SEEDSTOCK Q124^{SV}

ID: QRFQ124 DOB: 06/02/2019 HBR AMFU,CAFU,DD13%,NHFU

A long made bull. His dams' sire, as with his embryo brother Raff Duke D367, bred extremely well for us. Note that Raff Prompter D347 is a flush brother to one of our longest and heaviest weighing sires ever produced Raff Dictator D364.

Hoff Moriah 822

RAFF STEWIE Q138^{SV}

ID: QRFQ138 DOB: 07/02/2019 HBR AMFU,CA13%,DDFU,NHFU

A bull with a pedigree containing the long living Raff Doris S128 who was finally retired at over 20 years of age. We were devastated when her daughter Raff Doris J407 passed to grass tetany as she was a beauty. Should bred some good females.

Raff Doris S128

RAFF SEEDSTOCK Q141 SV

ID: QRFQ141 DOB: 08/02/2019 HBR AMFU,CAFU,DDFU,NHFU

Suitable for heifers. Q141 has a very appealing side profile with good neck extension and front-end smoothness. For those that prefer to keep mature cow size in check then this lot should appeal as from visual observation in the paddock and knowing his cows within his pedigree there is nothing of extreme frame size.

RAFF JOVIAL Q152 SV

ID: QRFQ152 DOB: 09/02/2019 HBR AMFU,CAFU,DDFU,NHFU

This Jovial son is a real beef bull with loads of hindquarter expression however not quite as docile to others. His genetic sisters are all beauties with a genetic brother having just been used within herd on some of our spring calvers. His dam and her flush sisters are tremendous breeders. We regret not using a brother to them.

RAFF MUSTANG Q203 SV

ID: QRFQ203 DOB: 26/02/2019 HBR AMFU,CAFU,DDFU,NHFU

Docility a plenty from both his sire and dam. His superb natured dam was the largest statured and heaviest weighing first calver within her group whilst his sire was a really attractive yet moderate framed beef bull with extra softness and muscle expression. It is a whole lot easier to reduce frame than maintain or improve it. Q203 is simply an uncomplicated beef bull.

RAFF EMPIRE Q225 PV

ID: QRFQ225 DOB: 04/03/2019 HBR AMFU,CAFU,DDFU,NHFU

This final lot is a genetic brother to Raff Hercules H411 himself who, when mature, weighed in excess of 1300 kilograms. This lots dam, being a flush sister to the dam of Hercules, is still with us having produced embryos herself following her move south and is now about to calve again this autumn. She is as fine skinned a female within our herd. There is loads of maternal power in this lot and he will certainly breed well beyond himself.

Stud founders David and Jill no longer reside on farm having moved to Toowoomba, Queensland following 56 years of dedicated breeding of Angus Seedstock cattle. Along with the bulls that sell this **Spring Celebration Sale** will see the very best of Raff Angus females sell showcasing the pick females from each year. We have never offered a complete sale line-up of our top end females like this. This sale offers a unique opportunity to invest in our very best maternal lines. It not only celebrates my parent's retirement but showcases their breeding direction since establishment in 1965 and their amazing dedication to the Angus breed. We welcome your attendance to join with us to celebrate their remarkable journey.

For any enquiries, please contact Anna or myself. Be sure to keep an eye on our website for sale location and updated information throughout the coming months
