

Welcome

Welcome to this years Female Production Sale at "Mundibulanga". We intend to make this event an Annual Production Sale for the future years ahead. After 10 years of drought with annual rainfall below half our average, 2012 marks our second year of recovery which has now given us the opportunity to stabilize our production and maintain a breeding herd at around 500 mature APR and HBR cows.

The emphasis we place on our cow herd is well known. Our philosophy has always been that if you have a superior herd of cows that are sound, functional and fertile they will produce bulls.

If a cow can not produce a bull calf good enough to sell as a breeding bull that cow has no place in our herd. We expect at least 95% of our male calves weaned to make it through to be sold as breeding bulls. All the animals in this sale have met these criteria and are a group of Angus cows and heifers we offer with confidence.

The Angus breed has experienced amazing growth in the past couple of years with recognition of the breed's superior meat qualities. The catalyst for the breed popularity was the introduction of MSA grading which defined meat quality followed by the work of CAAB (Certified Australian Angus Beef) which took up the challenge of identifying premium meat quality with Angus. Today Angus beef is the most recognized quality beef product in the world and CAAB the most recognized branded beef product.

We at Raff Angus have always recognized the meat qualities of Angus and during nearly half a century of selective breeding have developed a herd of beef cattle that have retained those wonderful Angus qualities. Further to these qualities we have incorporated growth and yield comparable to any breed or composite in the world today. We now have a herd of black cattle that are unique in their genetic make up and unique in their type - they just happen to be pure Angus. Our goal always has been and remains totally focused on breeding the type of cattle that maximize the dollar return to the commercial cattle breeder by maximizing growth and yield with quality.

This sale gives Angus enthusiasts the opportunity to have access to genetics away from the mainstream which are backed by 46 years of dedicated breeding of Angus Seedstock. Please take this as a personal invitation to attend and be sure to call if you have any queries.

COMMISSION AND REBATES

5% commission will be paid to any agent:-

- Accompanying a client to the sale.
OR
- Attends the sale and purchases on a clients behalf
- Settling within seven days.

2% commission will be paid to any agent:-

- Introducing a purchaser to the vendor 48 hours prior to the sale but not accompanying the client to the sale.
- Settling within seven days

AGENTS PLEASE NOTE -

The vendors will make no exceptions to any of these conditions.

All introductions to be made to Andrew Raff:

Email raffangus@bigpond.com
Fax 07 4627 6293
Phone 07 4627 6064
Mobile 0429 691 975

DELIVERY AND TRANSPORT

All delivery arrangements will be managed by Mick and Kathleen Moffatt
Mobile 0407 658 194
Home 07 4665 8154

SALE INFORMATION

Registration Status

All animals are either **HBR** (Herd Book Registered) with a green tag or **APR** (Angus Performance Registered) with a yellow tag. Those with a white tag are fully imported Hoff embryo progeny.

Animal Identification

All animals are freeze branded with the 'bench axe' symbol, year letter and number. A near side ear tag has the females ID, year letter and number. The off side ear has the females NLIS tag. Lot numbers will be paint branded on animals on sale day.

Inspection

An Open Day will be held on Sunday 25th March when all sale cattle will be available for inspection. Sires and joining sires to these sale lots will also be available for inspection that day.

Sale animals may be inspected prior to the sale by arrangement with the vendors.
Cattle will be penned ready for inspection from 9am on the morning of the sale.

Delivery

Cattle will be available for delivery immediately after the sale. "Mundibulanga" is in a tick free area and cattle are free to move interstate.

Transfer

All lots that sell are registered with Angus Australia. If you would like your purchases transferred then be sure to inform our sales manager at the completion of the sale. The associated transfer fee will be borne by the successful purchasers.

Refreshments

Lunch and refreshments will be available on sale day with the compliments of the Raff family.

AuctionsPlus - Raff Angus Female Sale is interfaced with AuctionsPlus.

Auction prices at this sale are live online and will be interfaced with the physical auction.

A computer is used to bring the real time "on property" prices to your Internet screen for those that have registered as AuctionPlus bidders. Online bidders can place a bid on their computer and the result is immediately transferred to the person on property controlling the device - then on to the auctioneer. Bidding is only available to registered AuctionsPlus users.

We recommend registering online as soon as possible if you wish to use the facility and become familiar with the sites operation. We have undertaken to use AuctionsPlus as an additional option - we will still operate phone bidding. It has been put in place in order to make it more convenient for our clients to secure their selected lots.

You must register at least 24 hours prior to the sale on www.auctionsplus.com.au

Phone Bidding

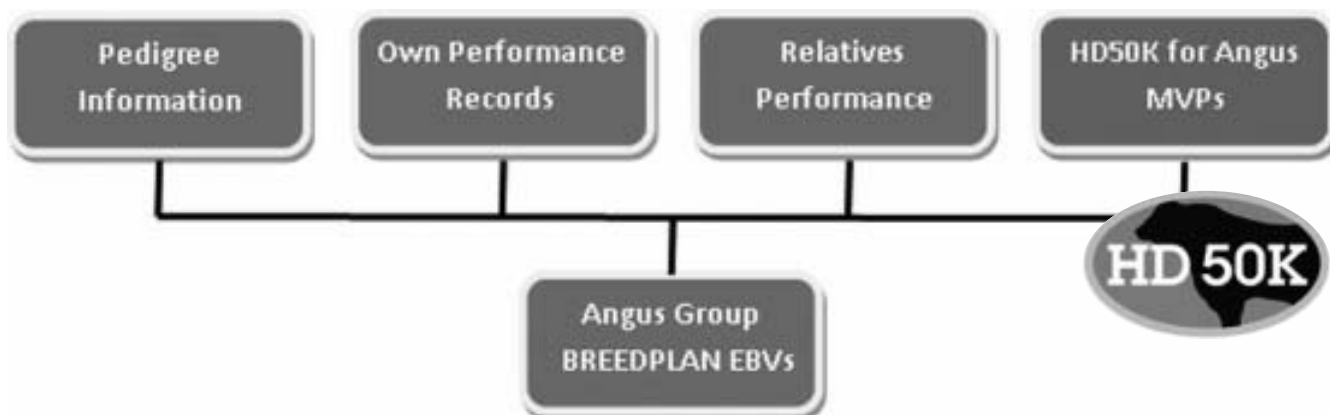

Phone bidding is available on sale day. Please make contact with us so arrangements can be made.

The first full female sale with complete Genomic Enhanced EBVs

Genomic enhanced EBVs are BREEDPLAN EBVs that now include an extra source of information to make those EBVs more accurate. The image below shows a graphic representation of all sources of information used by BREEDPLAN to calculate EBVs.

Raff Angus is at the forefront of adoption for DNA technologies and this female sale is an excellent example of this. Raff Angus are the first Angus stud in Australia to test all animals to be sold with the HD50K for Angus in order to provide this information to buyers.

Which traits are incorporated into BREEDPLAN and which are completely outside of BREEDPLAN?

As part of the monthly Angus Group BREEDPLAN run, breeders and buyers alike are getting a suite of the most advanced selection tools available for any breed anywhere in the world. The addition, since April 2011, of Pfizer's Molecular Value Predictions (MVPs) for 11 traits to the calculation of Angus Group BREEDPLAN EBVs has revolutionized the way that young animals can be selected increasing the rate of genetic gain for the Angus breed in Australia.

- o **Calving:** (Calving Ease Direct#, Calving Ease Daughters#, Birth Weight#)
- o **Fertility:** (Scrotal Size*)
- o **Growth:** (Weaning Weight#, Milk#, Yearling Weight*, Mature Cow Weight*)
- o **Feedlot:** (Dry Matter Intake‡, Feedlot Daily Gain‡, Net Feed Intake‡)
- o **Carcase:** (Carcase Weight#, Rib Fat#, Eye Muscle Area#, Marbling#, Tenderness‡)

traits included in the BREEDPLAN analysis; *traits soon to be included; ‡ traits outside of BREEDPLAN

angus Raff angus

— Breeding Angus in Queensland since 1965 —

Raff Angus use multiple sources of information to make breeding and selection decisions on farm. We have always said that our preference is to use MVP's as a stand alone product. However our breed society and beef recording organisations have made it mandatory for the reporting of genomic information to be in the form of a GE-EBV. This means that we have been left with no option other than to present this information as genomic enhanced estimated breeding values to the public to avoid confusion.

By incorporating this genomic information into EBV's we are unable to report some very important traits that we now have information on, feed efficiency, meat tenderness and daily weight gain simply because Breedplan does not have the facilities to report them.

The major advantages of genomics are

- The ability to determine the genetic potential of an animal virtually at birth.
- It is information about the individual animal, not a mid-parent estimate based on assumptions.
- It can not be influenced by the environment or manipulated by humans.
- It provides meaningful data on hard to measure traits like feed efficiency and meat tenderness.
- Its ability to describe the difference between ET flush sibs at an early age.

The objective of Raff Angus in using the HD50K for Angus is to "describe" an animal and its genetic potential. With the use of genomics Raff Angus is able to select the type of animal that will be able to perform and thrive under the prevalent conditions on their clients' properties. By defining their own breeding objective that combines the attributes of an optimal animal we are able to determine where we need to be in relation to each trait and identify those animals with the genetic potential to perform under these conditions.

Raff Angus tries to avoid chasing "Top 1%" animals for all traits rather establish the optimum performance level for a sustainable production in each trait.

Angus GROUP BREEDPLAN EBV percentile bands for animals born in 2010*

Use this table as a guide to compare individual animals with the current genetic level of the Angus breed

REFERENCE JOINING SIRES

HOFF LIMITED EDITION is a real legend in the Angus breed world wide. His progeny have sold to \$32,000 and with semen sales has grossed us in excess of \$1.5 million. His daughters are some of our best breeding cows. We have limited semen available and will consider using him again on females that need a real injection of power in several years time. This bull needs no introduction to the industry. **34 daughters sell and 2 lots AI'd to him.**

J & C APPEAL A10 first took our eye when a young calf on his mother - we returned a year later and purchased him. Few bulls have had such a positive impact in breeding bulls as Appeal has. His progeny consistently sell for an \$8,000 plus average and at the 2011 Sydney Royal both the Senior and Junior Champion Angus bulls were both Appeal sons. We have not experienced a sire to so consistently transmit weight for age into progeny. He is the sire of Raff Empire E269. **15 daughters sell and 2 lots AI'd to him.**

RAFF X-FACTOR X3 was purchased back into the herd as an aged bull after topping our 2003 bull sale. He is one of our highest IMF% scanning bulls as was his dam Doris V9 and his flush sister. X-Factor is incredibly potent at breeding high marbling cattle from even moderate IMF cows. As a rising 10 year old he is sound and still very active in natural service. He will continue to be used selectively to add fat and marbling without compromising pedigree merit. His MVP's (Molecular Value Predictions) have him in the top 2% of the breed for Marbling. **7 daughters sell and 4 lots depastured to him.**

REFERENCE JOINING SIRES

RAFF EMPIRE E269 is a 10th generation Raff bred bull who traces back to our foundation cow, Sarum Doris 19th who we purchased in 1965. His 3rd dam is sired by Raff Ultimate U27 who we bred from the great Burnette family and is a direct descendant of the great Burnette A22. We consider Empire to be the greatest bull we have ever bred. He has won eleven Inter-breed Supreme Beef Exhibit titles including the Melbourne Royal Angus Feature Show and Dubbo Beef Spectacular. A bull described by the 2011 Melbourne Show judge David Bondfield, Palgrove Charolais as *'the reason why Australia should be exporting semen to USA not importing it.'* His MVP's (Molecular Value Predictions) have him in the top 30% of the breed for Marbling. **2 direct daughters sell as Buyers Choice @ lots 47 & 48 and 13 lots A1'd or depastured to him.**

RAFF EXPLOSIVE E108 is one of only a handful of Connealy Danny Boy sons in Australia. He is a massive bull that typifies what a Raff bull should be - phenomenal growth, extreme length, great neck extension and perfect shoulder set who is sound on his feet and legs with a powerful head. He prowls the paddock like a cat while maintaining his condition at the completion of a season having come out of cows last month weighing 1200kg's. He is also a flush brother to stud sire Raff Enforcer E41. **12 lots sell depastured to him.**

RAFF EXTERMINATOR E201 was a stand out at birth and is proving to be one of our better breeding bulls. His extreme length, strength of spine, thickness and sheer capacity sets this bull apart from the rest. Used heavily as a yearling and again as a two year old Exterminator has not really had a chance to physically express his potential. His identical flush brother who sold for \$18,000 at our sale last year who at 25 months weighed 1,152 kg, EMA of 147sq cm, 17/15mm fat, 6.1% IMF and a 44cm scrotal with a 7.9 frame - just an awesome body of beef that ticks all the boxes! **15 lots sell depastured to him.**

REFERENCE JOINING SIRES

RAFF DISTINCTION D197 must be considered one of our better bulls resulting from our USA embryo import program. With so much power, substance, volume and capacity Distinction really is an amazing beef bull. He is wide based with excellent feet and legs; he has a long body and a strong spine with incredible width and depth of hindquarter. Like all Moriah sons he has a wonderful disposition. In our search for a modern sire to use on our Hoff cows we found Connealy Danny Boy - his sire. An aged bull when we inspected him Danny Boy was not an extreme bull but one of the soundest and better made bulls with a pedigree full of proven and good sound genetics, he actually looked like a proper beef bull! **1 daughter sells and 10 lots depastured to him.**

RAFF DALLAS D216 was Senior and Grand Champion Angus Bull at the Brisbane Royal in 2010 and Reserve Senior Champion at the Adelaide Angus Feature Show that same year. At both shows he had the highest growth and largest EMA of all breeds while boasting double digit fat scans and an IMF of 7.0%. He is a large framed bull with wonderful neck extension and shoulder profile who works the paddock with the greatest of ease ~ his daughters are special. His MVP's (Molecular Value Predictions) have him in the top 30% of the breed for Marbling. **1 daughter sells and 11 lots depastured to him.**

RAFF DUKE D367 is a powerful, thick and deep bodied bull with a wonderful disposition. He is one of six sons of the great Hoff Moriah 822 we have retained for stud sire duties. Her progeny are all incredibly consistent, are big and powerful with excellent structure and temperament. His sire is Shady Brook Prime 251F who was regarded as one of the best GT Expo sons. Andrew and Anna regarded the Shady Brook Prime cows in the Hoff Dispersal as the best sire group in the sale. The first progeny of Duke are impressive - quality plus. **1 daughter sells along with 23 lots depastured to him.**

REFERENCE JOINING SIRES

RAFF DAKOTA D85 is a massive 63 inch bull and $\frac{3}{4}$ brother to Hoff Limited Edition that is just so beautifully balanced and structurally correct. Contrary to his performance data Dakota is one of our most complete bulls, a bull that will make cows the right shape for them to thrive, survive and reproduce in any environment. While his dam Hoff Blackbird 5217 was not a prolific embryo producer her sons and daughters have been outstanding. He will stand here for quite some time as we can always use a bull like him. **5 daughters sell.**

RAFF DAZZLER D353 is a unique performance sire for raw data, EBV's and MVP's. He is a low birth weight bull with explosive growth, massive scrotal, carcass weight and eye muscle area. His MVP's have him in the top 9% for tenderness, excellent feed efficiency and better than breed average for marbling. Sired by Papa Equator from our great Hoff Blackbird 5217 Dazzler is a flush sister to Raff Dynamite D345 who sold for \$18,000 at our 2011 sale and show cow/donor Raff Blackbird D349. The sheer red meat capacity and fine skin type complement Dazzlers' performance. He is currently for sale as he will be replaced by a full genetic brother we have recently purchased from Stoney Point Angus, Keith SA. **3 daughters sell along with 23 lots depastured to him.**

RAFF DICTATOR D364 is a massive 64 inch and 1300kg son of Hoff Lady Durham by the old breed legend Leachman Prompter. His athleticism, carriage and little bit of arrogance - the way he prances around the paddock - has earned him the title 'the thoroughbred stallion'. His progeny have the extra neck extension and lovely shoulder setting of their sire - his daughters should make wonderful cows. He is currently for sale as he will be replaced by a flush brother we have purchased back after selling him in 2008. **3 daughters sell along with 16 lots depastured to him.**

RAFF EMPEROR E106 is another power packed Moriah son. We used his sire Leachman Hoss to capture the genetics of his dam Leachman Lass 1004 (also the dam of Leachman Prompter) a cow that David Raff ranks as one of the all time great Angus cows he has ever seen. Emperor is a big boned and strong headed sire with near perfect feet and legs with big testicles. He has so much volume and width of hindquarter that indicate he should breed cows with shape and capacity. **6 lots sell depastured to him.**

RAFF ENCORE E110 is a ¼ brother to Emperor combining what we believe to be the best modern day cow Hoff Moriah 822 with our favorite old cow Leachman Lass 1004 - the power of the pedigree really shows through here. To sustain a viable cow herd sooner or later the breed is going to need these reliable tried and proven genetics that breed bulls with power and capacity and cows that have shape and constitution. Encore is an upstanding individual, smooth through the front, wide through the back end and has a wonderful nature. He will sell at our September 24th bull sale as he will be replaced by another flush brother Raff Freddo F143 who is currently in our show team. **6 lots sell depastured to him.**

Lot 3 - Raff Lady Durham E58

There are only six Connealy Danny Boy daughters in Australia - with four flush sisters retained this fully imported Hoff female is the first ever offered for sale. She is wedgy with great teat placement and is certainly of outcross genetics to the mainstream Angus pedigree. Depastured **Raff XFactor X3** 19/05/11 to 11/07/11.

From birth this heifer always expressed extra power, bone and shear grunt as her pedigree would suggest. Her dam is a big matron with volume, extra jaw and muzzle strength and is a big milker. AI to **Raff Empire E269** due 21/07/12. Depastured QRFD353 15/10/11 to 06/01/12.

Lot 68 - Raff Burnette F149

Raff Burnette F149 is all maternal. There is a great cow on every line of her pedigree and sires that are a little more moderate and of easy care. She is very quiet natured. AI to **Raff Empire E269** due 22/07/12. Depastured QRFD353 15/10/11 to 06/01/12.

Lot 71 - Raff Moriah F25

This is the first Hoff Moriah 822 fully imported heifer to ever be offered. The first 24 direct Moriah 822 sons have sold to average \$10,000 having topped the last three Raff Angus Bull sales ~ seven sons have also been retained for stud duties. This is a rare opportunity. Hand mated **Raff Fortune F344** on 06/02/12.

Raff Blackbird F14

A March born full sister to lot 72 weighing in excess of 800kg at 22 months.

Blackbird E265 is a fully imported Hoff heifer who is a direct daughter of the magnificent breeding cow Blackbird 5217. We have retained a flush brother, Ego E266, who we used heavily on heifers last season with another sold to Irelands Angus. She is an outstanding genetic package. Depastured **Raff Empire E269** 07/10/11 to 11/12/11.

Lot 79 - Raff Doris E235

This is an easy care Appeal daughter that has plenty of substance yet still remains feminine. The Burnette and Doris cow families have certainly been our most potent - she has both within her pedigree. Depastured **Raff Dictator D364** 19/08/11 to 17/09/11.

A very docile female whose sire is proving to be a strong maternal sire for us. Her dam is a very neat cow with a magnificent udder which, like this daughter, is very docile. Depastured **Raff Exterminator E201** 22/08/11 to 03/01/12.

Lot 84 - Raff Burnette E192

The genetics within this lot may be older style but they are sound and have certainly stood the test of time. E192 is a really well made cow. Premier Julie resulted from the mating between two fully imported animals introduced by us in the mid 1980's. Depastured **Raff Exterminator E201** 22/08/11 to 03/01/12.

The Game has changed...

The new HD 50K for Angus provides MVPs on 16 traits using more than 50,000 DNA markers, providing the most reliable genomic predictions today. Now incorporated into Angus Group BREEDPLAN EBVs!

The new High-Density (HD) 50K for Angus provides Molecular Value Predictions (MVPs) for economically important traits, allowing you to:

- Identify early, those calves with the best genetic potential
- Make genetic progress on economically important traits that are difficult to measure
- Increase accuracy to allow more informed selection decisions
- Increase your rate of genetic gain
- Provide more value to your customers

To take breeding decisions to the next level call 1300 768 400 or visit www.pfizeranimalgenetics.com.au

Lot 94 - Raff Doris D306

A visually appealing cow with good girth and spring of rib. Her sire was a powerful sire that looked a little flat sided until you tried to fit him up the race - he could not fit. He was incredibly balanced and mobile for a bull of that size. Depastured **Raff Emblem E69** 25/08/11 to 23/12/11.

96 RAFF DUCHESS D286 14/08/2008

Lot 96 - Raff Duchess D286

We consider this lot to be one of the longest females catalogued to sell whose first two calves have come in at a 344 day calving interval. Her dam is a wonderful silky skinned donor cow that appeals from any angle - a cow that we could have a herd full of. Depastured **Raff Emblem E69** 21/09/11 to 23/12/11.

 RAFF BURNETTE U175 (APR)
 RAFF BURNETTE R60 (APR) (AI)

This is a very high performance cow both on paper and individually. She is a typically quiet Time Frame daughter with big feet and a strong jaw. Join her to any modern small framed sire and you should meet in the middle on phenotype. Depastured **Raff Dallas D216** 21/09/11 to 29/12/11.

Lot 119 - Raff Doris B167

Doing the 'farmers test' I think she tricked me with the AI and will actually calve down around the sale to Dazzler D353. This is another powerful Time Frame daughter - they are all of a kind. Depastured **Raff Dazzler D353** 28/05/11 to 11/07/11. AI to DMM Shift 785 due 26/08/12.

CAWDOR DORIS W110 (HBR) 7/9/2001

Lot 132 - Cawdor Doris W110

This is a wonderful Raff Ultimate daughter who is very docile and always breeds well. She is all Raff genetics with her Cawdor prefix being my brother's family. There is a great opportunity to gain some strong Burnette and Doris bloodlines in this lot. Depastured Raff Emblem E69 25/08/11 to 23/12/11.

VOLUNTARY WARRANTIES for bulls, females and embryos. Recommended for use by Angus Australia members selling at auction or by private treaty. Version 5 as at October 13, 2008.

FEMALES

1. The seller warrants that:
 - (1) Females over 8 months and catalogued as unjoined or not pregnancy tested in calf (PTIC) are fertile to natural service within 12 months of date of sale to the purchaser ("**Warranty Period**"); and
 - (2) No fertility warranty is given in respect of females pregnancy tested in calf (PTIC). A PTIC certificate does not constitute a warranty but is the veterinarian's opinion that the female was in calf at the date of certificate.
 - (3) Females offered for sale are of the parentage as catalogued.
2. The seller will credit or refund the purchase price of females (excluding any costs and expenses of the purchaser in taking delivery):
 - (1) Where the purchaser claims a female is infertile, upon the purchaser submitting a veterinary report after the expiration of the Warranty Period to the effect that the purchaser has been unable to get the female in calf to natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the female has suffered any injury or illness during the Warranty Period which could have affected her breeding ability. The veterinarian must also state that in his/her opinion there is no evidence that the female has been subjected to embryo transfer procedures during the Warranty Period. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring. Any refund payable by the seller will be made within 21 days following the receipt by the seller of the veterinary report and Statutory Declaration.
 - (2) Where the purchaser claims a female is not of the parentage catalogued, upon the purchaser submitting a DNA test or blood test within the Warranty Period indicating that the female is not of stated parentage.
 - (3) Where the term "credit" is used means the giving by the seller to the purchaser of a sum equivalent to the amount of the purchase price for use by the purchaser only in relation to the purchaser from the seller of another female.
3. The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the females supplied are reasonably fit for any purpose for which they are being acquired.

Disclaimer of Warranties

The seller makes no representations or warranties regarding the state, quality or condition of the females offered for sale or sold. The Trade Practices Act, 1974 (Cth) and certain corresponding State Legislation imply terms, conditions and warranties into some contracts for the supply of goods and services and prohibit the exclusion, restriction and modification of such terms ("Prescribed Terms"). Except as provided by the Prescribed Terms all terms, conditions and warranties express or implied by custom, law or statute in any way relating to the state, quality or condition of the females offered for sale or sold are hereby excluded.

Limitation of Liability

Except as provided by the Prescribed Terms, the seller shall not be liable for any indirect, incidental, special and/or consequential damages including but not limited to loss of profits arising out of any reliance by the purchaser on the information or content set out in this sale catalogue and/or the quality or condition of the females offered for sale or sold.

To the maximum extent permitted by law the seller's liability for breach of any Prescribed Term is limited at the option of the seller to:

- i. The replacement of the female; or
- ii. The supply of an equivalent female; or
- iii. The payment of the cost of replacing the female or acquiring an equivalent female.
